- Ecommerce website development
- Server/database installment and remote control
- Web and application servers administration
- Custom development and CMS
- Ecommerce solutions
- Corporate portals development
- Application UI/UX
- Web Design & Development

Finance Management Platform

Challenge

For its web application that manages prepaid bank cards, the customer wanted to have UI that would enable to create and manage its end-user individual accounts with ease, while allowing system admins to instantly access the statics and other necessary information about end-user accounts.

Solution

In a matter of few months ShreeRaj Technologies provides the client with a full-functional User Interface, smoothly integrated with rich and comprehensive back-end features. Implemented features include generation of statics charts and pies, notification engine, monitoring of user transactions. User-oriented features: topping-up credit card via online and offline systems.

How we work

Project lifecycle

ShreeRaj
Technologies

INITIATION

- Your challenge, NDA, initial interview and case research

PROPOSAL

- Scrupulous analysis of your business case resulted in well-structured and clear proposal.

BLUEPRINT & UI/UX DESIGN

- Detailed analysis, developing the project blueprint, project wireframes

DEVELOPMENT, TESTING & DEPLOYMENT

- Pre-Alfa, Alfa, Beta and production versions coding, testing and deployment. May require several iterations.

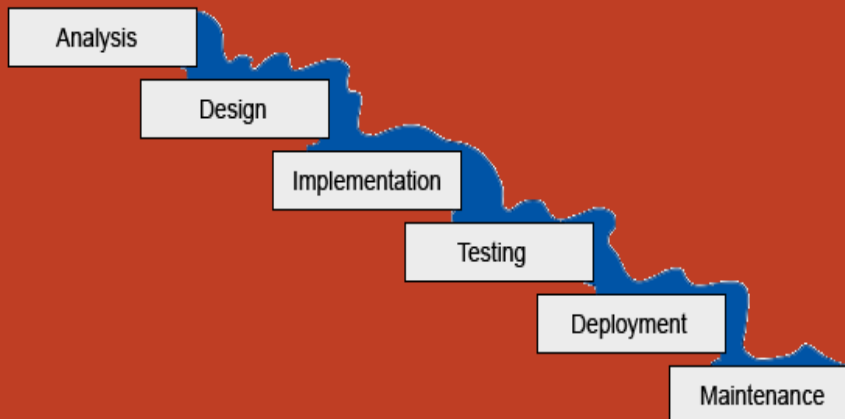

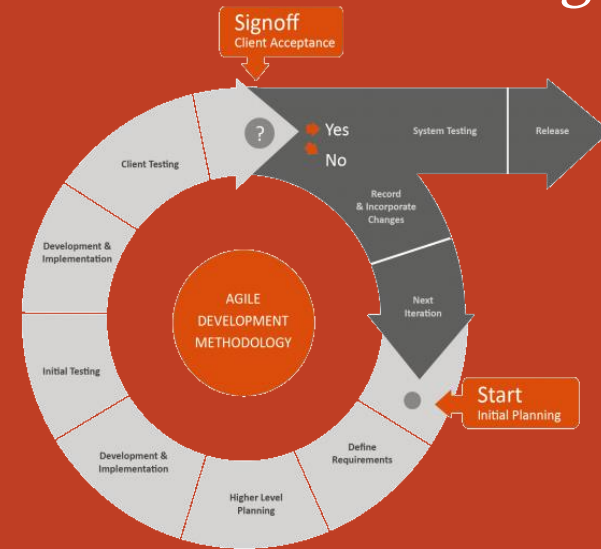

SUPPORT & MAINTENANCE

- Keeping your software up and running and its further developing in response to the market challenges and customer's request.

How we work Methodologies

AGILE

Based on continuous iterations each having its own Design, Development, and Testing Cycle, our Agile process enables to deliver you solutions faster, with less need for detailed documentation, i.e. for less investment costs and with shorter time-to-market.

Waterfall

We drive you all the way thorough Conception, Initiation analysis, Design, Coding, Testing, Implementation and Maintenance stages that ensure you have robust software meeting your goals and initial requirements.

How we work

Pricing models

ShreeRaj
Technologies

TIME & MATERIAL

Enormous flexibility and control over your budget, enabling to manage and change the development process on the go.

Good for: projects with few or many unknowns and having flexible project scope or for the projects in their maintenance phases.

DEDICATED TEAM

Extension of your own team, it gives maximum control but requires more involvement into project management from the customer's part.

Good for: projects which are constantly innovating and developing and having own project management staff.

Why ShreeRaj Technologies?

Value proposition

ShreeRaj
Technologies

CONFIDENCE

We use only cutting-edge technologies to develop best-in-class solutions for our customers. The use, for instance, of the wide-spread and efficient Java, Groove and Grail enables us to create scalable solutions which can be easily adapted to customers' emerging needs.

RESPONSIBILITY

Driven by the passion our software developers deliver the enormous volume of code, yet producing it of the highest quality and on time.

NO BUREAUCRACY

Our compact well-balanced team applies best efforts to eradicate bureaucracy to the ground concentrating all the attention on efficient and productive customer-oriented solutions instead.
